-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application filed August 1, 2003, is a continuation of 09/510,444, filed 02/21/2000, now US PAT 6,602,711.

The preliminary amendment filed August 8, 2003 has been received and entered. The specification has been amended. Claims 1-15 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of producing primate embryoid bodies from colonies comprising removing cells in clumps and incubating the clumps under conditions which inhibit attachment and promote coalescence, classified in class 435, subclass 1.1.
- II. Claims 11 and 12, drawn to primate embryoid bodies, classified in class 435, subclass 325.
- III. Claims 13-15, drawn to differentiated primate cells, classified in class 435, subclass 325.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be

Art Unit: 1632

made by another and materially different process (MPEP § 806.05(f)). In the instant case embryoid bodies can be made with other methodology known in the art.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions encompass materially different products. While one, the embryoid body, can be used to generate the other, a differentiated cell, the embryoid body has other uses besides generating differentiated cells. Further, differentiated cells can be obtained from other sources using other methodology that does not require an embryoid body.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search of one group will not be complete nor commensurate in scope with that required for a complete search of any remaining groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1632

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
